For a list of all members of the International Nosocomial Infection Control Consortium and all coauthors of this study, see the Appendix.

The funding for design, development, maintenance, technical support, data validation, and report generation of the Surveillance Online System, and the activities carried out at International Nosocomial Infection Control Consortium headquarters, were provided by VDR and the Foundation to Fight against Nosocomial Infections.

All authors were involved in provision of study patients, critical revision of the manuscript for important intellectual content, and final approval of the manuscript. VDR was responsible for study conception and design, drafting of the manuscript, software development, technical support, report generation, data validation, data assembly, data interpretation, and epidemiologic and statistical analysis.

Conflicts of interest: None to report.
